

10/2/18

Wallingford Energy Committee Meeting Minutes

Present: R. Nimtz, J. Armstrong, D. Blodget, J. White, K. MacLauchan

6:35 called to order

J. White: Motion to approve the minutes

Discussion on verbiage in paragraph 1- final line struck from 9/11 minutes as ambiguous. Motion passed

2. With Ken absent, little is known about how the select board meeting went. MacLauchlan recalls from the Wallingford Economic Development Committee meeting that the process went well, and it's possible we'll see some funds from the developer. General discussion on the project. Doug volunteered to fill out the state form applying for Electric Vehicle Charging Equipment at Municipal Park and Rides expressing interest in the project.

3. Energy Plan manuscript finished, but total plan is not complete. R. Nimtz- change Bottled Gas- John- using the language that matches the image on page 12 of the draft. Plan on track.

4. Wallingford Economic Development Committee also looking to host business specific workshop focused on saving businesses money. This could dovetail into the obligations of the town plan. Button up workshops more beneficial for homeowners (who don't come?), EV has programs already aimed at small businesses. J. White - the format might not work. Tie into the craft fair? Follow up needed from K. Welch and Paul Markowitz.

5. Community plan booklet is extensive. Communications group might be a good resource for getting the word out.

6. No new business.

Adjourned at 19:24

1. Minutes review/ approval
2. PUC solar siting determination update
3. WEC Energy Plan, progress report and submittal schedule
4. Button-up workshop grant
5. Community Visit implications for WEC
