Wallingford, VT 05773**

November 12, 2019

Dear Resident;

It's at the request of the Prudential Committee that this notice be sent to you. We request that you may turn on your water blow off system at any time now.

As a registered water blow off user, the Prudential Committee is requesting that the maximum flow of water used for your blow off be no larger than 1/16th- 1/8th inch. It only takes a trickle of water to keep the pipes from freezing. If you can shut it off during the day when it is above freezing, we ask that you do that. We may have our water operator come and check your blow off to make sure it is running the proper amount as we have had some very high usage in the past couple of years.

Please take note, this allowed blow off is intended to drain away from your home and not be put into the sewer system, as it creates an additional burden and expense to process the wastewater, causing unnecessary cost to the sewer budget.

If you have any questions, please feel free to contact our office between the hours of 8:30 a.m. – 4:00 p.m. Monday – Thursday (802) 446-2964.

Thank you in advance for your assistance with this important matter.

Sincerely,

Marianne Goulet
Clerk/Treasurer
